

Topic Scope

- * Security of Web-based applications and services Anti-malware techniques: detection, analysis, and prevention Intrusion prevention, detection, and response
- * Security for electronic voting
- * Combating cyber-crime: anti-phishing, anti-spam, anti-fraud techniques
- * Privacy and anonymity technologies
- * Network perimeter controls: firewalls, packet filters, and application gateways
- * Security for emerging technologies: sensor networks, wireless/mobile (and ad hoc) networks, and personal communication systems
- * Security for Vehicular Ad-hoc Networks (VANETs)
- * Security for peer-to-peer and overlay network systems

Security for electronic commerce: e.g., payment, barter, EDI, notarization, timestamping, endorsement, and licensing

- * Implementation, deployment and management of network security policies
- * Intellectual property protection: protocols, implementations, metering, watermarking, digital rights management
- * Integrating security services with system and application security facilities and protocols
- * Public key infrastructures, key management, certification, and revocation
- * Special problems and case studies: e.g., tradeoffs between security and efficiency, usability, reliability and cost
- * Security for collaborative applications: teleconferencing and video-conferencing
- * Software hardening: e.g., detecting and defending against software bugs (overflows, etc.)
- * Security for large-scale systems and critical infrastructures

Submission Deadline: October 15th, 2017

Good News!

1. Papers of ICINS 2016 have been indexed by Ei Compendex and Scopus!

2. Proceedings of ICINS 2016 can be checked online now
